

MARKET UPDATE

- The FTSE Canada Universe Bond Index dipped back into negative territory on the month, producing a return of negative 2.74%. June was a month of rising rates on inflationary concerns perhaps overshooting to the upside, July transitioned to growth concerns with rates overshooting to the downside and August ended with rates close to the mid-point of the two extremes.
- The Government of Canada 2-year yield is the only tenor that managed to find a new peak on the month and is clearly most sensitive to changing guidance and expectations regarding terminal policy rates. 2-year yields were up 69 bps on the month and resulted in the significant 2's/10's inversion of about 50 bps. Front-end Canadian yields are now higher than the broader index.
- North American central bankers were in full force priming the market for their upcoming policy announcements in September. The key message: higher rates are necessary and there is a likelihood rates will need to remain at terminal longer than the market is currently expecting to achieve their inflation targets over a reasonable period. Read: markets expectation for rate cuts in 2023 is premature and counter to policy objectives, inflation remains the primary concern of monetary policy. The coming months and quarters will shed light on just how much weakness central bankers will be willing to tolerate on the growth and labour market fronts – when and if they begin to soften.

CREDIT IN FOCUS

- Canadian credit spreads tightened about 5 bps, on average, across the entire corporate complex and was out of step with the broader risk-off rally that unfolded on the month. Corporate bonds outperformed governments in each maturity bucket, with the BBB-rated corporates leading the way across the curve. This despite a month of negative equity performance. Improved valuations and the most attractive all-in corporate yields since 2009 have likely lent support.
- Provincial bond spreads moved opposite corporates, with spreads wider across the curve, owing to their relative underperformance. Spread widening was most acute in mid- and long-term tenures with spreads moving 3-7 bps higher. Despite the recent fiscal improvement in Alberta, lower oil prices worked in the opposite direction this month, as the province's longer term spreads were the worst performer in August.

IMPORTANT DISCLOSURES

This document may contain certain forward-looking statements. In some cases, forward-looking statements can be identified by terminology such as "may", "will", "should", "expect", "plan", "anticipate", "believe", "potential", "continue", "target" or the negative of these terms, or other comparable terminology. By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and a number of factors could cause actual events or results to differ materially from the results discussed in the forward-looking statements. In evaluating these statements, readers should specifically consider various factors that may cause actual results to differ materially from any forward-looking statement.

This document is intended only to provide general information and is not intended to be and should not be construed or relied upon as legal or other professional advice. Fiera Capital Corporation ("Fiera Capital") assumes no liability by providing this guidance to its clients or any other person or entity. The information provided herein may or may not apply in any particular situation. Users should carefully review the guidance included here to determine applicability. The information and opinions herein are provided for informational purposes only and are subject to change. The information provided herein does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. Views expressed regarding a particular company, security, industry or market sector should not be considered an indication of trading intent of any funds managed by Fiera Capital. Management fees and expenses all may be associated with pooled fund investments. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account management fees or income taxes payable by any unitholder that would have reduced returns. Valuations and returns are computed and stated in Canadian dollars, unless otherwise noted. Unless otherwise noted, index returns are presented as total returns, which reflect both price performance and income from dividend payments, if any, but do not reflect fees, brokerage commissions or other expenses of investing. The index comparisons in this presentation are provided for informational purposes only and should not be used as the basis for making an investment decision. Furthermore, the performance of the respective pooled funds and their corresponding index may not be comparable. There may be significant differences between a pooled and the indices referenced, including, but not limited to, risk profile, liquidity, volatility and asset composition. Information pertaining to Fiera Capital pooled funds is not to be construed as a public offering of securities in any jurisdictions of Canada or otherwise. The offering of units of Fiera Capital pooled funds is made pursuant to the funds' trust agreement and only to those investors in jurisdictions of Canada who meet certain eligibility or minimum purchase requirements. Important information about Fiera Capital pooled funds, including a statement of the fund's investment objective, is contained in their trust agreement, a copy of which may be obtained from Fiera Capital. Unit values and investment returns will fluctuate. Please read the trust agreement of the pooled funds before investing. Pooled funds are not guaranteed, their values change frequently and past performance may not be repeated.
